Near 'You can use a Kalman filter in any place where you have uncertain information' shouldn't there be a caveat that the 'dynamic system' obeys the markov property? I.e. a process where given the present, the future is independent of the past (not true in financial data for example). **Filter press - Wikipedia** An industrial filter press is a tool used in separation processes, specifically to separate solids and liquids. The process uses the principle of pressure drive, [clarification needed] as provided by a slurry pump. Among other uses, filter presses are utilized in marble factories in order to separate water from mud in order to reuse the water during the marble cutting process.
